

SENTRY ISOLOK MSE SAMPLER Point Samplers

AUTOMATIC SAMPLING

The Sentry[®] ISOLOK[®] MSE automatic point sampler is designed for sampling high-viscosity products such as toothpaste, peanut butter, tomato paste, juice concentrates – even rocket propellant – at pressures from 0-150 psig.

The ISOLOK MSE sampler delivers a fixed volume of sample with each cycle.

MODELS

ISOLOK MSE

BENEFITS

The ISOLOK MSE sampler delivers a fixed volume of sample with each cycle. The sampler mounts onto the process line using a two-inch tri-clamp ferrule mount held with a clamp and gasket. All product-contact seals are FDA-recognized elastomer compounds selected to meet application conditions.

The ISOLOK MSE sampler's dual air cylinders extend the plunger into the process, and the annulus opens and draws in product. The plunger retracts, holding the sample in the annulus. Once fully retracted, the annulus collapses, ejecting the sample into the container.

The operator is isolated from the process at all times by the sampler's seal design, and the sample captured in the container is locked out from external influences to provide a truly representative sample.

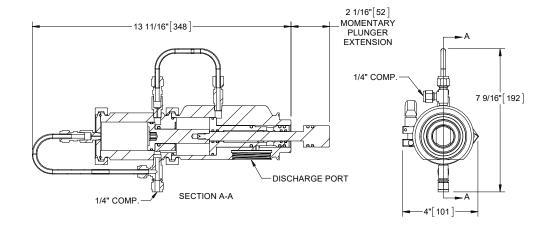

FEATURES

- Samples high-viscosity materials using a contracting annulus that ejects each collected sample into the attached container
- Collects sample volume of 10 cc per cycle in process pressures from atmospheric to 150 psig (10.3 barg)
- Unique co-axial pneumatic cylinders
- Ideal for liquids or slurries up to 300,000 centipoise
- Options include port closures, line adapters, different container types, sampler enclosures (with or without heater), sample heating or refrigeration, optional materials of construction and seal choices

SENTRY ISOLOK MSE SAMPLER > POINT SAMPLERS > AUTOMATIC SAMPLING

| SPECIFICATIONS | |
|-------------------------------------|--|
| sample volume per cycle | 10 сс |
| maximum cycle frequency | 6 strokes per minute, depending on application |
| line mounting options | tri-clamp |
| materials | 316 stainless steel/Buna-N; other seal materials available |
| sample temperature range | -40° to 500°F (-40° to 260°C), depending on seal material and duty cycle |
| ambient operating temperature range | -5° to 131°F (-20° to 55°C), depending on seal material |
| compressed air requirement | 2 SCFM at 90 psi (.05 m ³ /min at 6.2 bar) |
| dimensions | 10.3 in x 4 in (26 cm x 10 cm) |
| shipping weight | 16.6 lb (7.5 kg) |
