

# Expertise. Reliability. Performance.

## Cooling Water Analysis Panel

Optimize your equipment to maintain asset and analytic reliability and future performance with cooling water analysis panels

Circulating water analytics and conditioning equipment are an important part of your overall water chemistry program. These components are often located in harsh outdoor environments that necessitate upgrades multiple times over a plant's operating life.

Sentry Equipment's team of application engineers are ready to custom design updated solutions for your circulating water/cooling tower analysis system.

Our experts can also help install, commission, and train site personnel to efficiently operate the equipment to meet your needs. Our service technicians are also available to provide maintenance throughout its operating life as well.

Ensure peace of mind knowing your cooling water analyzer panels are built with the same Sentry Equipment quality you've come to expect from your steam and water sample panels.

## WHY SENTRY?

### SAMPLING & ANALYTICAL EXPERTISE

Sentry Equipment has a long history of successfully delivering sample panels to utility, oil & gas, and pulp & paper customers. Customers can be assured that all water panel upgrades will meet the needs of your plant.

### BRAND INCLUSIVE SUPPORT

Sentry technicians can suggest appropriate equipment that best supports your plant's requirements and preferences by focusing on providing a user-friendly solution from your chosen analyzer brand.

### MAINTENANCE EXPERTISE

Sentry Equipment has the expertise necessary to build and install equipment and service your equipment to minimize process impacts and maintain equipment integrity.

# Cooling Water Panel Solutions.

## ANALYZER ADDITION & REPLACEMENT

### Brand Neutral Makes and Models

- Installation
- Start-up
- Calibration
- Training
- Service

## PANEL UPGRADES & REPLACEMENTS

### Circulating Water Analysis Panels

### Cooling Water Analysis Panels

### Sample Point Additions

## SAMPLE POINT ADDITIONS

### Sample Tubing

- Rerouting to New Locations
- Replace Damaged Tubing
- Remove and Replace Plugged Sample Lines

### Sample Panel Consolidation

- Maximize Sample Processes
- Minimize Space Considerations

### Pump Skids

### Blowdown Valves/Headers Upgrades or Additions

- Minimize Space Considerations

## ANALYTIC TROUBLESHOOTING

### Analyzer Issues

- Reliability
- Maintenance
- Calibration
- Chemistry/Analytic Questions

## THE SENTRY DIFFERENCE

### TECHNICAL TROUBLESHOOTING

When your sampling and analysis equipment or processes fail, you need immediate support. Our team's knowledge will ensure your sampling system provides the critical chemistry data your plant needs from sample extraction, conditioning, and analytics. We are available by phone (1-262-567-7256 ext. 2) and email ([support@sentry-equip.com](mailto:support@sentry-equip.com)) to help troubleshoot technical issues to get your equipment back online.

Sample. Monitor. Measure.
