

Safety. Reliability. Performance.

Installation and Retrofit Services

Navigate equipment needs as it ages to maintain personnel safety, asset and analytic reliability and future performance.

Critical cycle chemistry analytics and conditioning equipment can become obsolete ahead of plan, resulting in the need for safe, efficient technology updates.

Sentry Equipment's team of service technicians, installation coordinators, product support specialists, and application engineers are ready to custom design updated solutions for your existing steam and water analysis system.

Our experts also help install, commission, and train site personnel to operate the equipment to meet your needs efficiently.

Ensure peace of mind knowing all installations and retrofits are built with the same Sentry Equipment quality products..

WHY INSTALLATION & RETROFIT?

RELIABLE, TRUSTWORTHY PROCESSES

Sentry's holistic, iterative focus on cycle chemistry provides assurance that all modifications will meet the needs of your plant processes.

BRAND AGNOSTIC SUPPORT

By focusing on sampling and not the brand, Sentry technicians can suggest appropriate analyzer and chemistry equipment that best support your desired process analytics.

MAINTENANCE EXPERTISE

Sentry Equipment has the expertise necessary to not only install equipment but also to minimize process impacts and ensure personnel are properly trained on how to maintain equipment upgrades.

Installation and Retrofit Solutions.

ANALYZER ADDITION & REPLACEMENT

Brand Agnostic Makes and Models

- Calibration
- Start-up
- Training

Analytic Accessories

- Sequencers
- Degassing Units
- Corrosion Protection Products

SAMPLE POINT ADDITIONS

Sample Tubing

- Rerouting to New Locations
- Replace Damaged Tubing
- Remove and Replace Plugged Sample Lines

Sample Panel Consolidation

- Maximize Sample Processes
- Minimize Space Considerations

CONDITIONING UPGRADES & REPLACEMENT

Secondary Cooling Racks

Temperature Control Unit Upgrades or Additions

Pump Skids

Blowdown Valves/Headers Upgrades or Additions

- VRELS
- Back Pressure Release Valves
- Thermal Shutoff Valves
- Sequencing

ANALYTIC TROUBLESHOOTING

Analyzer Issues

- Reliability
- Maintenance
- Calibration
- Chemistry/Analytic Questions

GuardSA Smart Alarms

THE SENTRY DIFFERENCE

TECHNICAL TROUBLESHOOTING

When your sampling and analysis equipment or processes fail, you need immediate support. From sample extraction, conditioning and analytics, our team's knowledge will ensure your sampling system provides the critical chemistry data your plant needs. We are available by phone (1-262-567-7256 ext. 2) and email (support@sentry-equip.com) to help troubleshoot technical issues to quickly get your equipment back online.

Sample. Monitor. Measure.
